## STRONG PROTECTION

Certified Premium resin is a pure acrylic formulation with high polymer solids for maximum protection. We do not use cheap fillers to artificially boost the film build and reduce the cost.

## QUALITY FINISH

It's a high-performance membrane that has up to 60% better initial gloss than standard roof coatings and up to 12% higher than the leading premium product in the market.

## EXTENSIVELY TESTED

The product has been extensively tested against leading opposition products and has been shown to outlast, outperform and has excellent colourfastness.

\*The printed colours are a guide only. Colours depicted are representative only and are as close as printing methods allow \*
